## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-27, drawn to a guide device having controllable stiffness through use of a control device that generate magnetic fields to bring mutual attraction between a first and at least one second wire.

Group II, claim(s) 28-30, drawn to a guide device having controllable stiffness through stretching a central hollow body to press plural second elongate bodies circumferentially surrounding the central body against an outer sleeve.

2. The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I controls the stiffness of the guide device through mutual attraction of wire threads while group II controls stiffness of the guide device through different and non obvious technical feature of stretching a hollow body to press circumferentially aligned bodies against an outer sleeve.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 3736

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
